

I listen to K-Love on 100.7 in the Mohawk Valley (Utica, NY area). K-Love is the only station I listen to. It is positive and encouraging, and it requires no 7-second delay as it is Christian programming, sponsored not by advertising dollars, but is supported exclusively through listener contributions; I contribute to K-Love through my monthly contribution. As K-Love is the only Christian radio station in our area, its potential loss due to the implementation of LPFM broadcasting would not provide a positive alternative the garbage that is found on many other FM stations. In my opinion, Christian radio should be encouraged by the FCC; it does not need to be monitored as other stations may, such as those airing shows like Howard Stern, which is unadulterated filth. I require a positive alternative to the filth that we are exposed to daily in the form of suggestive / offending / graphic television programming and advertising that was once considered pornographic. Please don't support the decay in moral standards by allowing LPFM radio to excerpt our reception of such a positive influence on the lives of those in the Mohawk Valley. Thank you for your concern; I pray that the FCC will make the correct choice to be a champion in support of more positive programming.
